About Eframe

We are delighted to introduce ourself. Eframe Infomedia Pvt. Ltd.

Eframe is unique in its array of innovative technology enabled solutions and creative services, helping large industries and corporates in their excursion towards success, with the best tech-enabled operations and procedures.

For the last 18 years, we have walked a sturdy path in creating a niche market of our own. The company helps organisations, enabling IT, through bespoke software development, mobile app Development, Animated e-learning tools, Virtual Reality based content creation, e-learning of Audio Visual content creation and likewise.

Our comprehensive 360° approach, coupled with utmost creativity and apt expertise, is delivering ideal solutions to our national and international clients, in turn availing benefits to the cosmopolitans.

We have umpteen innovative solutions to help industries and businesses flourish and become more agile with upright efficiency.

Virtual Reality Based
Simulator For
Defensive Driving

VR FORKLIFT SIMULATOR

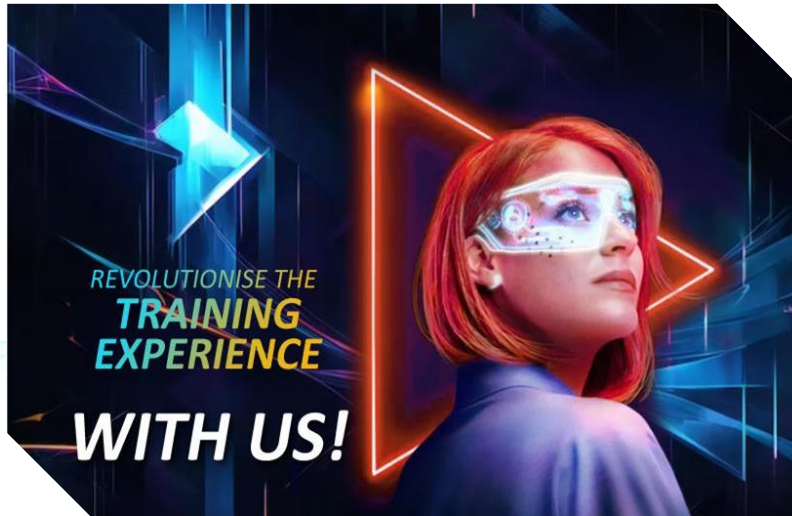

Objective of the forklift VR based simulator

- A simulator is a machine designed to provide a **realistic imitation of the controls and operation of a vehicle** or any other complex system, used for **training purposes**.
- Use of simulator as a **defensive driving training tool** is extremely popular.
- And **Virtual Reality based simulator** adds the perfect icing on the cake.

Advantages of VR based Simulator

VR based simulator training is at present used by leading companies globally to screen and train their workforce in virtual reality.

- **SAFETY:** With forklift VR based simulator there are **no training damages and liabilities** to worry about. Even if new operators make mistake that can be refreshed **on zero risks on best practises**.
- **REALISTIC & DETAILED:** Basic **physics** are attended with minute details. Operators can leverage the **depth perspective** provided by the VR **to exercise their skills**.

Advantages of VR based Simulator

- **PRACTICALITY:** Learn while taking a play ride. **Warehouse space, cost and productivity** can be maintained as the training goes **virtual**.
- **COST EFFECTIVENESS:** Cost savings can be observed in **screening, hiring, retention and training**.
- **CUSTOMIZABLE:** A company can model their facility in VR based simulation that allows for **training in various working conditions or environments, different vehicle types, varied attachments** and even **workflows**.

Solution Outcomes of VR Based Simulator

- PRODUCTIVITY IMPROVEMENT
- FAMILIARIZATION OF CONTROLS
- BLIND SPOT JUDGEMENT
- LOAD JUDGEMENT
- SPEED JUDGEMENT
- PERFECT AVOIDANCE OF COLLISION

VR FORKLIFT SIMULATOR

Effective Reporting System

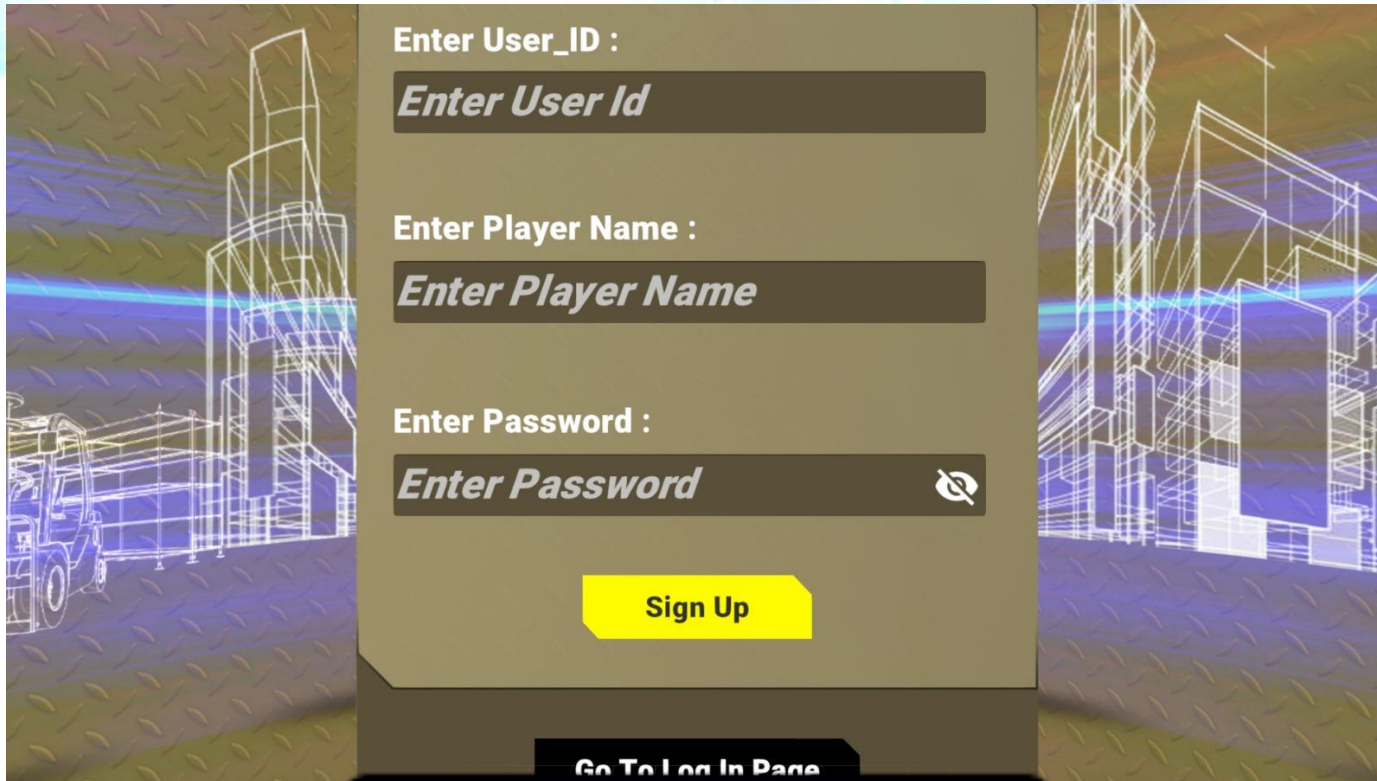

After a successful completion of the Defensive Driving Program, the operator will be given an issued certificate.

This proper reporting system will help the operators further for an appropriate evaluation of his/her learning management.

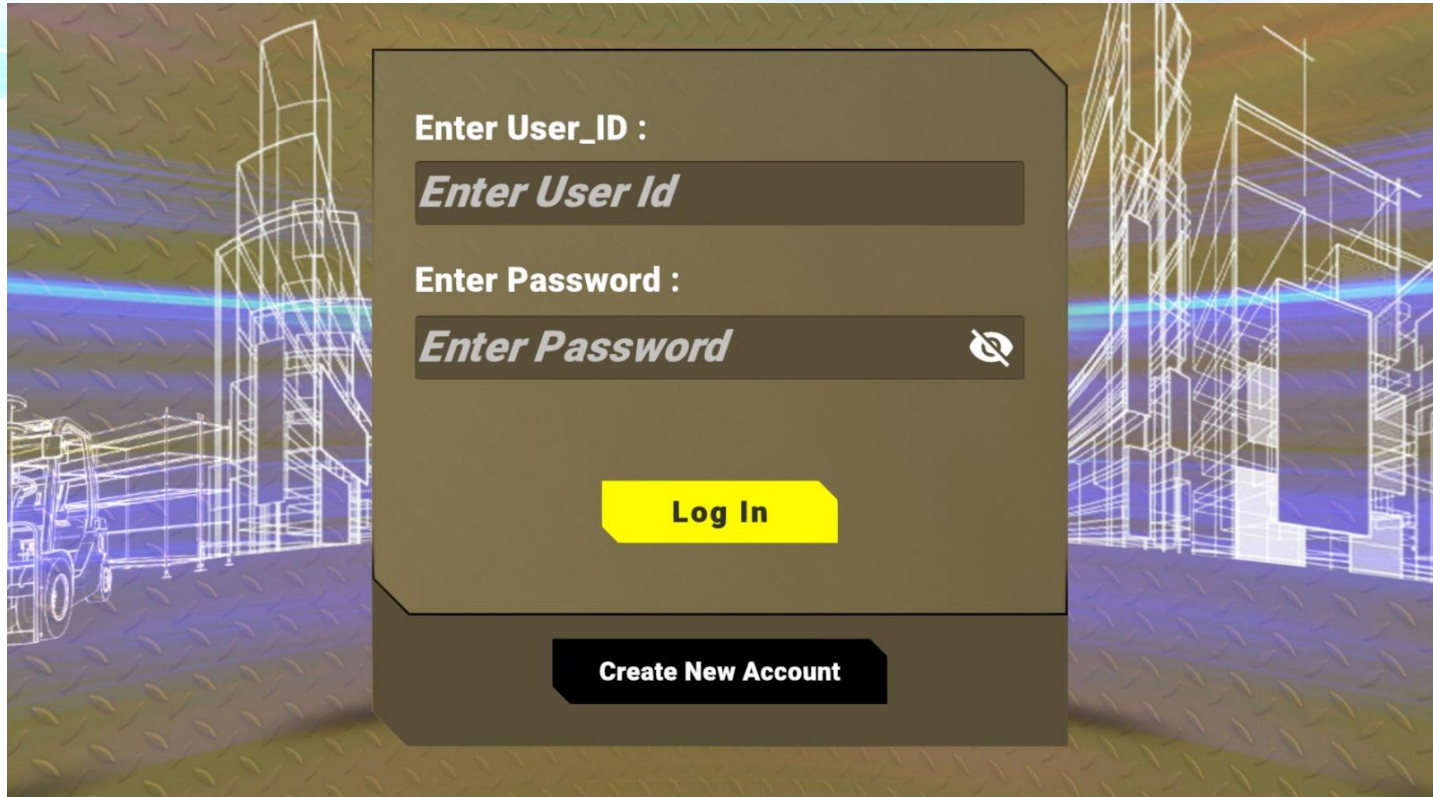

The admin too can observe the level of risk perception and defensive driving habits of the operators as well, through the reporting system and thus keep an eye on the gradual evaluation of the operators.

User Creating a New Account inside VR Module

The image shows a VR interface for creating a new account. The background is a wireframe architectural scene with a car on the left and buildings on the right, all rendered in blue and white lines. In the center, there is a semi-transparent grey panel with a dark grey border. This panel contains three input fields, each with a label and a placeholder text. The first field is labeled 'Enter User_ID :' and has the placeholder 'Enter User Id'. The second field is labeled 'Enter Player Name :' and has the placeholder 'Enter Player Name'. The third field is labeled 'Enter Password :' and has the placeholder 'Enter Password' along with a small eye icon to toggle visibility. Below these fields is a yellow 'Sign Up' button. At the very bottom of the panel is a dark grey button labeled 'Go To Log In Page'.

User Logging in for Module

The login interface is a dark gray panel with a metallic diamond-plate texture background. It contains two input fields for 'Enter User_ID' and 'Enter Password', both with placeholder text 'Enter User Id' and 'Enter Password' respectively. The password field has a toggle icon. Below the fields are two buttons: a yellow 'Log In' button and a black 'Create New Account' button. The background of the entire slide features a blue and white wireframe architectural drawing of a building and a vehicle.

Recommendations

Do's:

Your skill is good.
Keep practicing.

Don'ts:

Keep a safe distance from vehicles!
Buckle up before you drive.
Do not drive on the wrong side.
Always wear a helmet!

Breakdown - Assessment 3

Operating at safe speed (5-7 km/h)	✓
Maintaining safe distance from other structures	✗
Maintaining safe distance from humans	✓
Keeping forks at proper position while moving	✗
Driving forward with or without load, forks pointed upward on inclines	✗
Using horn where necessary	✗
Being aware of visibility obstructions	✓
Avoiding dual action	✓
Aligning and positioning forks properly	✓
Tilting mast back slightly to stabilize load	✓
Ensuring load is balanced and secure	✓

VR FORKLIFT SIMULATOR

Simulator Solutions Other Offerings

- VR Defensive Driving Simulator
(for two-wheelers & four-wheelers)
- VR EOT Crane Simulator
- VR Excavator Simulator
- Any kind of heavy-engineering vehicles
(like BTV, MTV etc)

OUR OFFERINGS

VR-AIDED INDUSTRIAL SAFETY TRAINING MODULE

- Work at Height
- Acrophobia Test
- Working at Scaffolds
- Fire Fighting
- Safety at Confined Space
- Electrical Safety
- LOTO

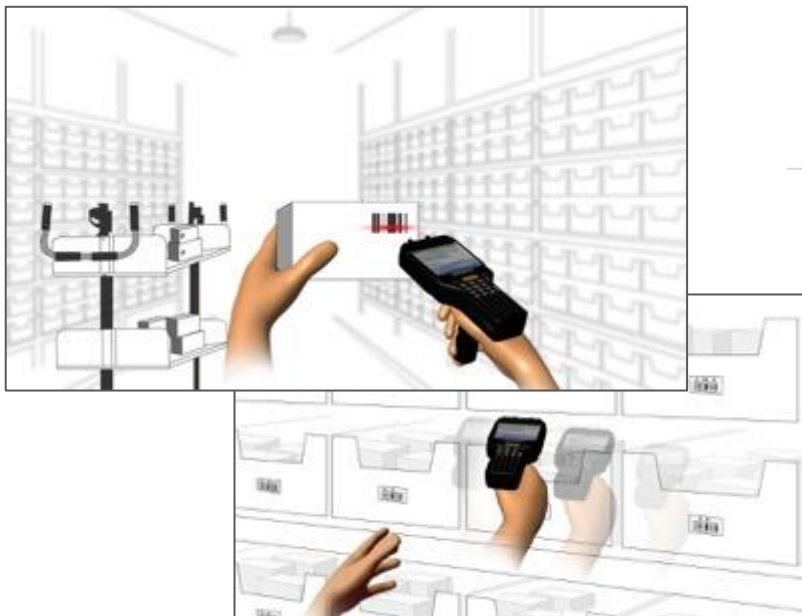

OTHER SOLUTIONS

- Case study analysis
- Best practice simulation
- VR applications that help identify and reduce risks in operations
- Gamification

Success Stories

Organisational Objectives

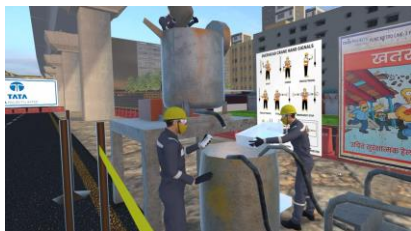

- To provide 360 degree Virtual Reality training assessment program
- Helping associates to learn and enhance their awareness while assessing their knowledge
- Declining of the probability of major errors
- Helping in saving time & Cost on the physical stowing process

Solution Highlights

- Training on how to Stow & Pick properly
- Identifying right aisle
- Sorting the ASIN accurately
- Matching & stowing ASIN with bin accurately
- Picking correct ASIN from correct bin

Success Stories

Organisational Objectives

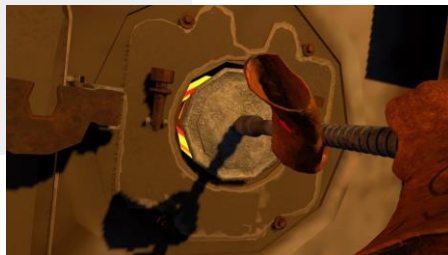

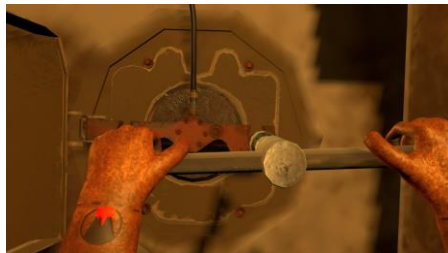

The training program through enabled Virtual Reality, aims to provide training & information to workers, regarding Safety & Operations during the construction of Segmented Bridge Structures using a Launching Girder.

Solution Highlights

- Training through a virtual 360° environment to provide real feel to workers
- Different steps of Auto-Launching Operation
- Covering Safety SOP at every step of the operation
- In depth analysis & explanation of every scenario
- Dos & Don'ts of each step of the operation

Success Stories

Organisational Objectives

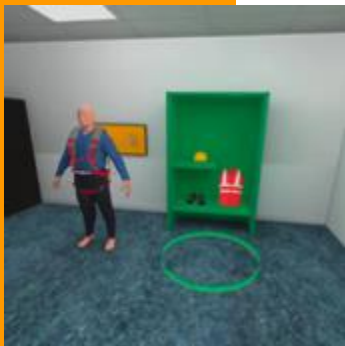

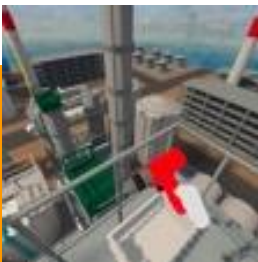

Eframe has crafted an SOP VR training module for refractory industry leader Vesuvius India Ltd. and has focused on Purging Plug Maintenance in Ladle.

Solution Highlights

- Understanding the SOP for Purging Plug Maintenance in Ladle.
- Selection of right tool & right method for the maintenance work.
- Virtual training with real-life like scenario for activities like – Lancing, Purging Plug maintenance, Purging Plug fixing, Gunning etc.

Success Stories

Organisational Objectives

- To provide 360 degree Virtual Reality training assessment program
- Helping employees to learn about the 'to be followed safety norms' while working at height, scaffolding & electrical jobs
- Declining of the probability of accidents.

Solution Highlights

Training on the safety norms to follow in

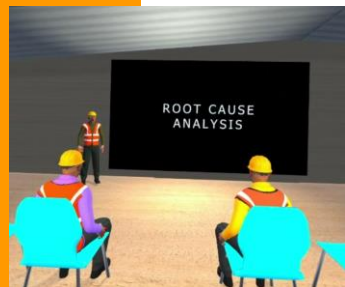

- **Working at Height,**
- **Scaffolding**
- **Electrical Safety**
- **Confined Space**
- **Heavy Crane Erection**

Success Stories

Case Study Analysis

Organisational Objectives

- To provide 360 degree Virtual Reality program on case study analysis
- Helping employees to learn about the 'to be followed safety norms' while working
- Declining of the probability of accidents.

Solution Highlights

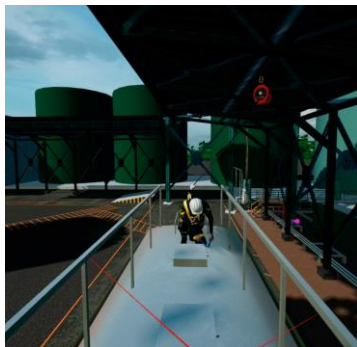

Training on the safety norms to follow while working

- **At construction sites**
- **Erection activity**
- **Lifting with Cranes**

and many more...

Success Stories

Organisational Objectives

- To provide 360 degree Virtual Reality program on truck loading & unloading activity
- Helping employees to learn about the 'to be followed safety norms' while **Working At Height**
- Declining of the probability of accidents

Solution Highlights

Training on the safety norms to follow while **Working At Height** for the modules on:

- **General Safety Guidelines**
- **Truck Loading**
- **Truck Unloading**

Success Stories

Case Study Analysis

Organisational Objectives

Eframe has crafted a VR training module for L&T Construction workforce, based on some incidents occurred while performing the platform relocation activity at heights.

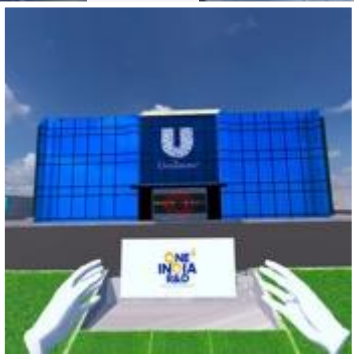

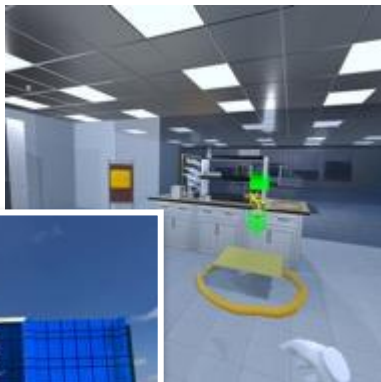

Solution Highlights

- Following the correct processes for **relocation activity** while **working at height**.
- Identifying the unsafe practices
- **Learning & Following the safe practices.**
- Completing a job with safe practices

Success Stories

Organisational Objectives

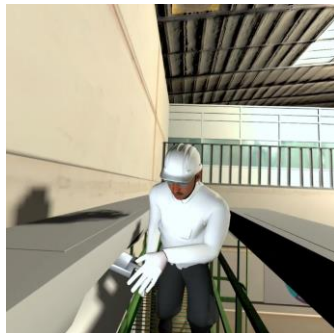

Eframe has crafted a VR module for the new joiners as well as new visitors of Hindustan Unilever regarding the hazards associated with machine room, chemical lab and likewise.

Solution Highlights

- Wearing essential PPEs.
- Identifying the **hazards associated with machines** and following the safety
- Identifying the **hazards associated with a chemical lab** and knowing process to overcome
- **Emergency evacuation**

Success Stories

Introduction

Eframe's VR solution for ITC is based on a critical Case Study Analysis, focused on height-related issues, to drive awareness among workers and prevent any future mistakes.

Organisational Objectives

- Using VR to provide a first hand understanding of work-at-height safety.
- Analysing a specific incident to identify mistakes and promote a culture of safety.
- Emphasizing the significance of PPEs, hazard identification, and adherence to correct procedures.

Success Stories

Organizational Objectives

- Emergency Fire Evacuation within 90 seconds from the workplace to the Emergency Assembly point.
- Safe Evacuation.

Solution Highlights

- The importance of identifying and following the **right safety signage**.
- **Following Signage to evacuate** through the correct route.
- **Crawling to avoid fire smoke** obstructing the evacuation route.
- Following a good behavioural practice for not placing any obstacle in the evacuation route.
- Informative alert system to infer the best practices of 'what to do' and 'what not to do' during fire emergencies while maintaining the emergency evacuation protocols.

Success Stories

Firefighting

Organizational Objective: VR Training on Fire Fighting guided by voice over and instructions.

Solution Highlights:

- Finding the source and cause of fire
- **Identifying the type of fire**
- Informing the concern person
- **Selection of right fire extinguisher**
- **Extinguishing the fire**

PPE (Personal Protective Equipment):

Organisational Objective: Identifying the right PPE for the right job.

Solution Highlights:

- **Understanding Different PPE's for over 100 different types of jobs.**
- **Virtual training for using & selecting the PPE.**
- Evaluation processed through assessment.

Augmented Reality Based Content & Services

Augmented Reality (AR) allows organizations to introduce concepts on safety in two different ways at the same time.

Digital imaging and animations are used to create unique learning experiences for any specific jobs at any locations, through smart devices.

AR provides exciting opportunities in reinforcing newer ideas by drawing attention to details, and increasing information retention.

Film Production

An AV training module aims on establishing a long lasting effect on the learners' mind. An enriched Audio Visual interaction always enhances explanations and organizations are thus to have better-trained and more engaged employees working for them in near future.

Eframe makes customized creative, persuasive and stylish Audio Video content on varied subjects. The customized lively and upbeat AV capsules are made for organizations, keen to deliver user friendly communication to all.

AV Production

- Induction Training Module
- SOP Training Module
- Case Study Based Training
- Corporate Film
- Briefing Videos
- Promotional Videos
- Live Action Training Videos
- To Camera Training
- Short films and Documentary

Safety Induction Module – Steel Industry

Steel Plant is a very vulnerable place. It is a high risk job and often on the floor adverse situation may become dangerous, if not properly dealt with or looked upon. Hence it is of extreme importance to practice and maintain proper techniques and methods while in there.

Eframe has successfully executed a Contractor Induction & SOP training module for Vesuvius India Ltd.

SOP Training Module – Shop Floor Jobs

Employees working at the shop floor should know about the standard working procedures of all the equipment before commencing the work flow.

Eframe has created SOP Training Video for CEAT, that has included every types of minute information, related to the jobs that need to be done on the shop floor.

SOP Training Video – Shop Floor Activities

Eframe created a three hours SOP training video for Amazon on various topics like - Cart, Cage & Trolley operation, Material Handling, Peak & PIT, LOTO, PTW, TDR etc. while keeping in mind the needs of their existing and new employees.

The video content on safety awareness, meant for their employees, was a total comprehensive package made in nine vernacular languages.

Corporate eLearning Solution

E-learning training module delivers structured courses or learning experiences electronically. Different elements such as live or pre-recorded lecture content, video, quizzes, simulations, games, activities, and other interactive elements can be engaging and fascinating. **Eframe** realises that self-paced e-learning(with its embeded e-learning models) is beneficial for better performance and higher efficiency in an organization.

Process Digitization Services

Exclusive Applications

- 1 Safety Audit Tool**
- 2 Permit To Work**
- 3 Standard Work Instructions**
- 4 QR Code Application**
- 5 Offsite Risk Assessment Centre**

1

Safety Audit Tool

Eframe has developed a mobile friendly solution for digitizing the audit process by storing all data in clouds and thereby transforming those activities, providing a Real-time platform for reporting and analysis.

Features:

- Summarized, comprehensive and real time audit information at a glance with corporate dashboards displaying trend analysis through charts, tables, and different graphs.
- Options for attaching pictures and recorded voice clips with observations and thereafter view those safety observations later.
- A rich Visual Dashboard that helps to analyze Audit related activities quickly and effectively.
- Automatic RPN (Risk Priority Number) calculation through the software.
- Helps to store Internal audit related activities, data and processes of the organisation in a safe, secure web-based platform.
- Provision to access audit data round the year.

2

Permit to Work Application

Eframe has developed an app, aligning with Job Safety Analysis (JSA) , that allows one to digitally generate permit for various processes, sorting out issues and saving time by reducing paper work.

Features:

- Full view of the entire work scenario to enable the in-charge to take correct and fast decision.
- Options to capture pictures, audio or video for assessment of pre/post PTW status.
- Allows creating or attaching Job Hazard Analysis (JHA) or Task Risk Assessment (TRA)
- Graphical representation of data analysis.
- Secure Cloud Database and User-friendly Interface.
- Compatible with Tablet/Smartphone

3

Standard Work Instructions

Eframe has developed a software for digitizing the process of current manual Standard Operating Procedure or Standard Work Instruction documents, reducing risks and errors.

Features:

- Fast Authoring intuitive interface to easily upload existing MS Office and PDF documents.
- Multimedia Support to showcase best practices with visuals and can be edited with the help of built-in markup tools.
- Instant Distribution releases newly approved versions across locations and devices quickly.
- Helps every user to work based on the current standard.
- Train Employees with Consistency.

4

QR Code Application

Eframe has developed a software, where, if the user scans the QR code of any required workstations or equipment one can view all the available documents on the scanned item. It is used for managing and accessing documents in a click.

Features:

- Customized QR code printed on equipment and workstations.
- User friendly app to access documents
- All related documents present
- Color codes for specific needs

5

Offsite Risk Assessment Centre

Eframe has developed an app that can remotely manage workplace safety through expert guidelines. It also helps in eliminating hazards by adapting preventive or protective measures.

Features:

- Taking and uploading video
- Expert assigned by Admin
- Assessment by Executor
- Verifier to revert views
- Helps the end user with a superior quality risk assessment without travelling to multiple locations.

Learning Management Systems (LMS)

LMS software solutions manage administration, monitoring and reporting of online courses and training programs within an organization. It serves as a virtual learning platform where trainees can learn at their own pace based on their specific needs and requirements as well as check progress through self evaluation. **Eframe** creates a platform for online content inventory, supporting the latest international standards (SCORM compliance).

Need

- Monitoring progress and performance
- Personalized Learning Experience
- Human engineering to integrate Social Learning Experiences

Benefits

- Guarantees effective online learning
- Cost saving
- Consistency of training
- Meeting regulatory compliances

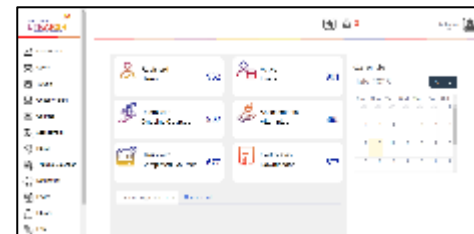

Himadri Utkarsh Learning Portal

A Learning Portal designed to serve as a central hub for training and development activities for any corporate organization; fostering continuous learning and skill enhancement among employees.

Feature Highlights

- Secure Access
- Tailored Training
- Compliance and Regulatory Training
- Competency Framework & Skill Gap Analysis
- Assessments and Certifications
- Learn-o-meter for User Growth
- Efficient Budget Management
- Trainer Management
- Insightful Reporting
- Extensive Resource Repository
- Integration with Corporate Systems
- Mobile Accessibility
- Seamless Communication
- Customization and Branding

Learning Management Systems (LMS)

Vesuvius HSE Learning Centre

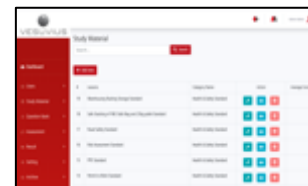

An LMS is framed to inculcate a veritable training for employees to get themselves adept to the company's HSE standard. The LMS interface, compliant with the latest international SCORM standard is equipped with assessment and certification of completion, providing full-proof data security.

User :

- Employees can log in with their IDs
- Learn different courses about the HSE processes
- Give Assessment to test their knowledge
- Get Certificates based on their performance

Admin :

- Track Employee's activities
- View their performance statuses via dashboard
- Create, modify or archive users and courses
- Admin can map users with courses manually

EHS Training & Induction

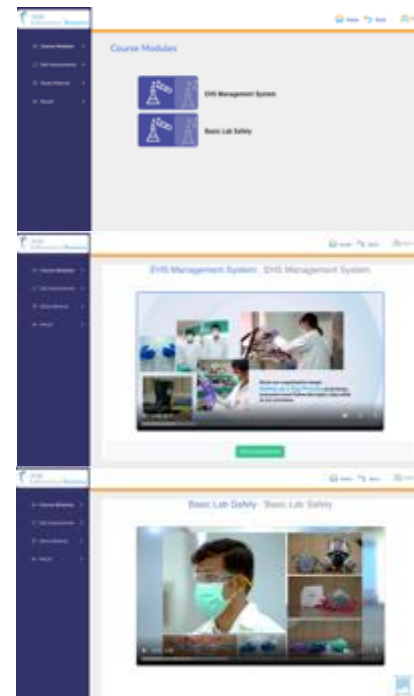

Eframe Technical team has designed an LMS embedded website for TCG-LS, consisting of – Basic Lab Safety, Biological Lab Safety & Chemical Lab Safety. The LMS is interspersed with animation, illustrations, graphics & AV content with interactive & comprehensive self-assessment.

User:

- Users get digitized course materials
- Assessments to test the understanding of the contents
- Topical multimedia AV content are created for enhanced learning experience

Admin :

- Track individual learner performance
- View their performance statuses via dashboard
- Create, modify or delete users and courses

Creative Branding/Campaign

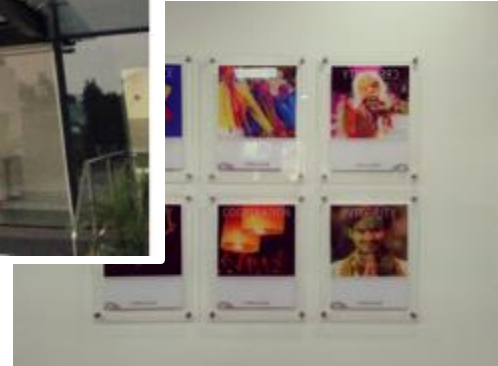

VacSingh Campaign- Scarborough Cares

Covid Awareness Campaign- Scarborough Cares

Vesuvius R&D Centre

Creative Branding/Campaign

Himadri Speciality Chemicals Ltd

An extensive training needs analysis, and proper understanding of the workflow of Vesuvius. A thorough end to end behavioral training program and motivational campaign has been produced by Eframe.

The campaign was successful in enabling each employee become a changed agent.

CEAT MISSION ZERO ACCIDENTS

Eframe has created a three minutes awareness Film for securing commitment from each employee to take personal pledges in order to avoid accidents.

Additional appropriate display materials were also printed emphasising on the correct behaviours that are to be practiced on floor.
